

Recolight containers

Recolight collect and recycle waste lamps for free. Larger volume collections are provided containers free of charge, for smaller volumes you can lease or purchase a container from us.

- If you collect more than 1000 lamps in a twelve week period, you can join the Recolight collection network. For wholesalers, you can offer a valuable service to your customers and also promote your business on our collection point map. You will have access to our online portal to book your collection. Your container will be provided free of charge.

Container leasing or purchase options if:

- You are planning a major re-lamping or re-fit project.
- You collect less than 1000 lamps in a twelve week period.

We have a lead time of six to ten working days for collection, so please don't wait until your container is completely full before contacting us to request a collection.

All our containers are designed for the storage of waste Gas Discharge Lamps included in the scope of the WEEE regulations pending collection for recycling.

RB19

- Delivered flat packed with instructions for simple assembly.
- Lid that can be secured so that it can be stored outside.
- Front drop flap for easier user access to the container and to minimise lamp breakage.
- Return collar above the base to increase rigidity of the container, ease transport, collection and stacking.
- Removable tray to ensure encapsulation of the waste and provide secondary bunding. This is to be fitted on set up and not removed.

Container specifications

| Length | Width | Depth |
|----------|--|---------|
| 1900 mm | 1000 mm | 1200 mm |
| Capacity | Dependent on lamp type and if correctly stacked, we estimate 1000 lamps. | |
| Material | Base and lid - High Density Polyethylene Sleeve and Return collar - Polypropylene | |

Recolight containers

Recolight RC4/RC6/RC8

The Recolight RC4, RC6 and RC8 are designed for backhauling waste lamps from your smaller sites to a site where you have an RB19.

The RC8 can also be used at sites where you have an RB19 but also collect 8 foot lamps.

The containers come flat packed and can be easily assembled. The straps provide extra rigidity and security when transporting.

Container specifications

| Container | Length | Width | Depth |
|-----------|---------|--------|--------|
| RC4 | 1220 mm | 254 mm | 254 mm |
| RC6 | 1830 mm | 254 mm | 254 mm |
| RC8 | 2440 mm | 254 mm | 254 mm |

| | |
|-----------------|--|
| capacity | Dependent on lamp type and if correctly stacked, we estimate each RC will hold 40 lamps. |
|-----------------|--|

| | |
|-----------------|--------------------------|
| Material | 3/700 translucent Correx |
|-----------------|--------------------------|
