

Getting WEEE right for lighting since 2005

NOT-FOR-PROFIT

Recolight are non-profit - minimising costs to our Members and providing end users with a free recycling service for all WEEE lighting.

LARGEST COLLECTION NETWORK FOR LIGHTING

Giving you access to the UK's most comprehensive free of charge recycling service network for lamps and luminaires.

LIGHTING WEEE SPECIALIST

Recolight lobby to get the regulations right for lighting. Helping to set the WEEE standard. Members of:

BIGGEST RECYCLER

Since 2007, Recolight has recycled more WEEE lighting than all other UK compliance schemes combined.

Recolight

have recycled

300

million lamps

since 2007

+

=

Recolight has funded the recycling of over **49,000 tonnes** of WEEE lighting since 2007, this is **more than** all other UK WEEE compliance schemes **combined**

Why Recolight is different

Not-for-profit

Recolight is a non-profit compliance scheme. This allows us to focus solely on making recycling of lighting easy and keeping our core charges to our Members as low as possible. Our size and financial strength means we are excellently placed to handle the changes in lamp and luminaire recycling which will apply in future years.

We recycle WEEE lighting

Most UK WEEE schemes with a lighting obligation meet their targets by buying evidence notes from recyclers, or other schemes. Evidence notes are certificates that confirm a quantity of waste has been recycled.

At Recolight, we do things differently. It is our objective to meet our targets entirely by organising the collection and recycling of waste. That means we can offer a free collection and recycling service; a service our Producer Members and end users can directly benefit from. We use the waste to meet our targets. It also means we have full duty of care traceability – we know exactly where the waste we recycle has come from.

49,000 tonnes recycled

To date, Recolight have funded the collection and recycling of over 49,000 tonnes of lamps, LEDs and luminaires. This achievement means that Recolight, together with our collection points and Producer Members, have been responsible for recycling more WEEE lighting products than all other UK compliance schemes put together.

Working for our Members

Lobbying to get the WEEE Regulations right

Recolight is active in lobbying to ensure that the WEEE Regulations and associated legislation are right for the UK lighting industry and its customers. We successfully lobbied to retain 14 reporting categories for our Members, thus avoiding red tape.

We also lobby to ensure that collection targets are correct – high enough to be stretching, but without causing excessive costs for the industry. We are currently very active in driving the adoption of measures to require products sold through online marketplaces to comply with WEEE and other legislation.

EucoLight

Recolight is an active member of the WEEE Scheme Forum, the UK WEEE compliance schemes' trade association and the Recolight CEO has been chair for over 5 years.

Recolight is a founder member of EucoLight, the trade association for WEEE compliance schemes in Europe that focuses on WEEE lighting. Through EucoLight, Recolight has a face and presence in Brussels. EucoLight helps to ensure that any changes to WEEE legislation at EU level are right for the lighting industry - whatever the outcome of the Brexit process.

Recolight's CEO, Nigel Harvey, has been a EucoLight board member for over four years. That means that Recolight is always at the forefront of legislative regulatory change for WEEE lighting.

EucoLight runs a number of working groups and research projects in various aspects of WEEE lighting, including a project to address the recyclability of retrofit LED lamps.

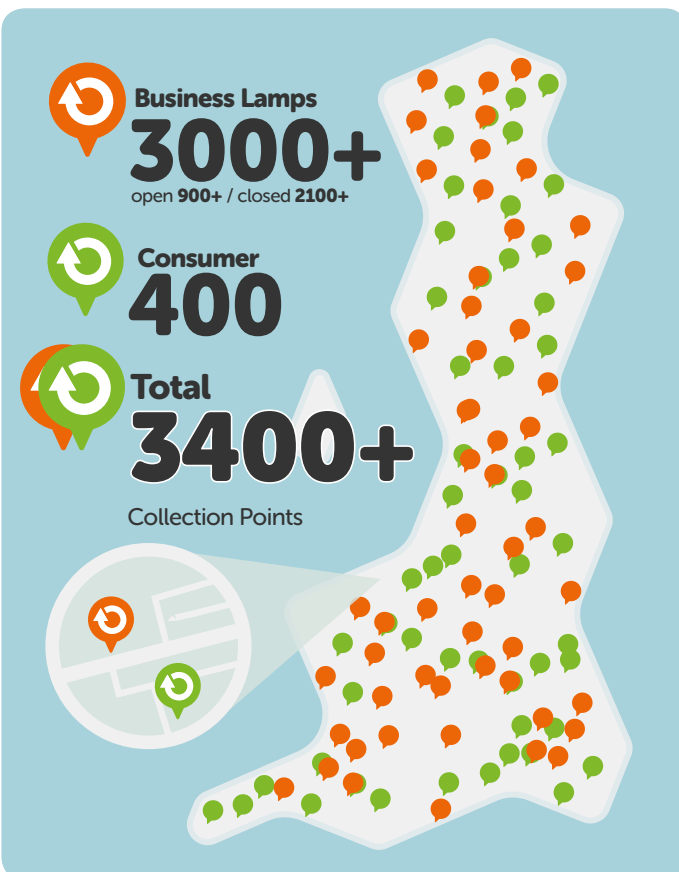

Recycling of lamps from business sources

Recolight has established a unique network of over 3,000 commercial collection points to collect and recycle waste lamps from business end users. They are located at wholesalers, contractors, facility management companies and end user sites.

Dedicated open network

Recolight is the only WEEE compliance scheme in the UK with a dedicated open collection point network for consumers and business waste lamps. These are for gas discharge and LED lamps.

Additionally, we have a network of over 60 open collection points for luminaires.

Recycling services

Waste clearance for major LED luminaire roll-out projects

Recolight's fastest growing service is the large scale, multi-site service for the collection of the waste lamps, luminaires, and batteries (from emergency fittings) that arise when conventional luminaires are replaced by LED equivalents.

The demands of corporate social responsibility mean that major specifiers require their luminaire suppliers to take responsibility for this waste. Recolight is the ideal partner to meet that need.

Free lamp & luminaire recycling

Recolight provides free regular collections of waste lamps, helping Members and their customers to recycle waste lamps as simply as possible. Collection containers can be provided free of charge and collection and recycling are also free. *

Recolight is the only compliance scheme that provides eligible business customers with:

- Free storage containers.
- Free collections and recycling.
- Dedicated customer service support team - helping businesses comply with environmental regulations.

Customers of Recolight Members collecting a minimum of 1,000 lamps every three months can apply to join Recolight's collection point network. They can choose to become an open collection point, enabling them to pass on the benefits of free and convenient lamp collections to their own customers.

*subject to status and availability

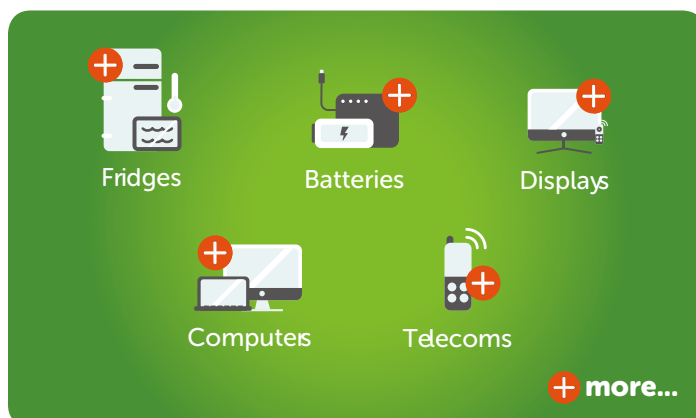

Other electrical Items

Recolight recycle other electrical items covered by the WEEE regulations, providing you with a complete WEEE service.

Operating as a non-profit organisation, we can do this at a low competitive cost.

- ✓ We can provide a container for your customers' waste lamps at your site, or your distributors' site.
- ✓ For regular large quantities of lamps, we can set up a free collection point at your customers' sites.
- ✓ For a large refit project we will provide a container, and collect it, free of charge.
- ✓ We also have a container lease option for smaller quantities of lamps, with free collection.
- ✓ You can send your customers to our nearest fully funded open collection point using the collection point locator on our website.
- ✓ We will also arrange collection and recycling of our Members' obligated waste luminaires.

Why does it matter?

Offering free recycling increases recycling rates

Research has shown that three quarters of electrical contractors believe recycling rates would decline if they were required to pay for recycling when lamps reach end of life. That clearly means it is essential to offer a recycling service for the end user, that is free at the point of use.

Guidance is available to collection partners through our website and newsletters for the safe storage and transportation of WEEE lighting, along with help for completing the paper work. Recolight actively promotes the need to recycle lighting keeping this waste stream out of landfill and raising the recycling rate.

Protecting the environment

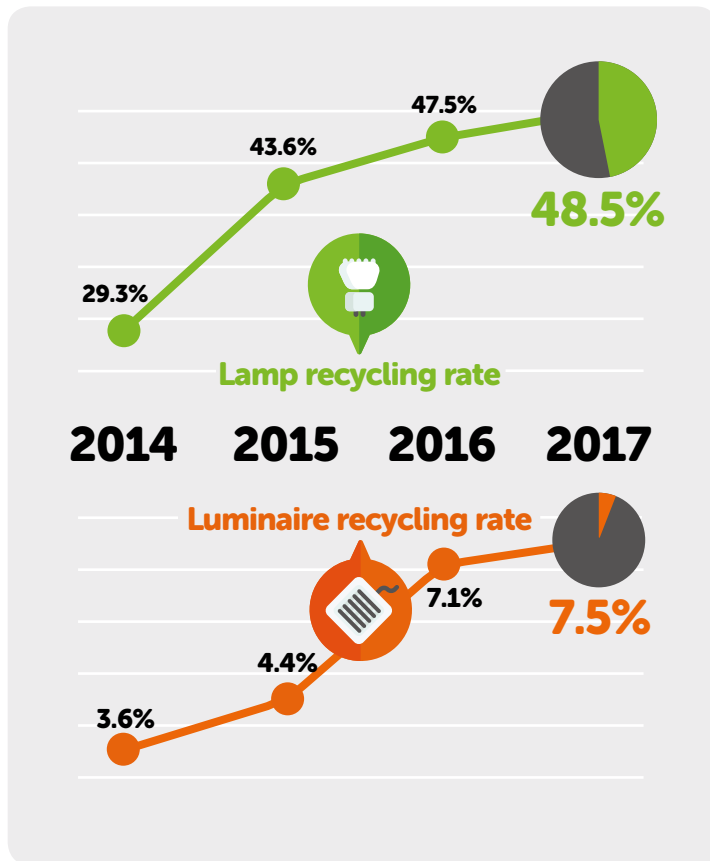

The disposal of end-of-life equipment is now an integral part of many LED luminaire projects, not just for legislative compliance, but also to meet the sustainability criteria for our Members' customers. With access to free lamp and luminaire recycling through Recolight you can be assured that your WEEE lighting has been disposed of responsibly.

Growth in Membership

Simplicity for our Producer Members and for their customers is one of the reasons why Recolight's membership continues to grow rapidly. Recolight Members include the leading lighting manufacturers as well as smaller and niche lighting importers and own branders.

Recolight Members

A large proportion of the lighting Producers registered in the UK have joined Recolight. That is because they want a simple approach to complying with the WEEE regulations, which keeps them legal and makes recycling as simple as possible for their customers. Recolight Members recognise that WEEE compliance is about more than just ticking a box and are actively committed to protecting the environment. But don't just take our word for it – look at what our Members have to say.

What our Members say about us

Steve Stark
Trade Sales Director, Ledvance

At Ledvance, we are confident that as a Member of Recolight we fully comply with the spirit of the WEEE regulations. Our customers know that through Recolight they have a **one stop shop** service for the recycling of our lighting equipment. **Recolight removes the burden of WEEE compliance**, allowing us to focus on our core business.

LEDHut are pleased to have joined the Recolight compliance scheme as a B2C member. Recolight's straightforward **per unit fee structure** means we can be confident in our WEEE costs, with no hidden surprises.

Clive Brown
Managing Director, LED Hut

Alex Lancashire
Managing Director, icLighting

As the Authorised Cree Distributor for the UK, compliance with all relevant legislation is very important to us. That is why we are pleased to be a Recolight Member – we know that they give us WEEE compliance that is backed by a **nationwide waste collection infrastructure**. The fact that they have recycled more lighting equipment than all other UK schemes combined is tangible proof of their success.

Feilo Sylvania are committed to providing our customers with the best possible solutions – and that includes a comprehensive recycling service. That's why our membership of the Recolight scheme is important to us. The Recolight network has over 2,000 collection points covering the whole of the UK. **That means our customers, wherever they are, can all access a free recycling service.**

John Storey
SBU Director, Feilo Sylvania

Steven Reed
Marketing Manager, GE Lighting

At GE we are proud of our green credentials. That is why Recolight membership is so important to us: We know that Recolight both **meets and exceeds our obligations to recycling lighting equipment**. Recolight is also very engaged in the **WEEE legislation**, and that means we can be sure we get the best possible information and advice.

Through circular design, reuse and recycling, upgradability and operational energy management, Philips Lighting seeks to ensure the lowest environmental footprint for our customers. Working with Recolight helps us deliver on this commitment by **providing our customers with a comprehensive recycling service.**

John Gorse
Technical Solutions Manager
Philips Lighting UK & Ireland

Recolight is a WEEE Producer Compliance Scheme, set up by and working for the lighting industry. We were established in 2005 with an operating model based on one developed by the forerunner of Lighting Europe, the European Trade Association for lighting manufacturers.

In addition to statutory financial and Environment Agency audits, Recolight is also audited by Ernst and Young for a wide range of operational, commercial, and performance criteria. That gives our Members the best possible confidence that Recolight is operating at the highest level of integrity and efficiency.

The WEEE regulations require producers of EEE and their compliance schemes to finance the treatment of WEEE. A large proportion of the UK lighting industry meet their producer obligations by being a Member of Recolight.
