JOIN THE WEEE SCHEME THAT GIVES YOU MORE, FOR LESS

Recolight gives you more, for less

Industry leading lower fees

Recolight's straightforward approach to charging contrasts with the complexities of traditional WEEE schemes. Our approach is to apply a **flat fee based on actual in-year sales**.

You have **no hidden costs** and no need to consider the consequences of market share changes and compliance fee; making budgeting simple.

You can be assured that you will get the best advice from Recolight; the specialist, not-for-profit, scheme for

- All lighting,
- All electrical items covered by the WEEE Regulations,
- And batteries too.

We fully understand the way WEEE affects lighting and **lobby to minimise the impact of this on your business**. Your customers can feel confident in your Membership of the UK's leading lighting compliance scheme; the scheme that has recycled more WEEE lighting than all other UK compliance schemes combined.

Simplicity for our Members and for their customers is one of the reasons why Recolight's Membership continues to grow.

Recycling made easy

To make it easier for your customers, Recolight do not ask for proof of payment for the streetlight luminaire installations that generate waste needing to be collected and recycled.

Recolight collect 100% of the waste lanterns arising from street lighting depots at which your luminaires make up a significant majority of the new luminaires being installed.

We simply ask you to verify that the company asking for the collection is your customer. This approach ensures that our collection process operates as smoothly as possible.

Instead of waiting for a scheduled collection, you can request collections whenever they are needed. Recolight's nationwide logistics partners operate several hundred collection vehicles, providing a fast and efficient service.

A choice of containers is available, including the added convenience of skips for larger sites. To use the skip service, you will be required to fill at least one 12-yard skip per month. If you don't have these volumes, we do have a pallet bag option.

Industry leading lower fees.
Not-for-profit; minimising costs to our Members and maximising recycling revenue.

You can rely on us to **lobby on your behalf** to make sure the WEEE regulations are right for lighting.

Recolight Team of WEEE experts helping you declare your data correctly. **Think of us as your compliance department.**

You can **have confidence** that your WEEE compliance is properly and professionally handled.

Member of EucoLight, working together to address the recycling challenges of the future.

Giving you More

Skips for a tidy yard. A range of skips for lanterns and containers for lamps to suit any size of yard, so no need for flimsy bags.

Collections can be requested to suit you through our simple online booking process.

All bookings are instantly available for monitoring and audit.
No need for emailing to and fro!

Reduced admin for your customers.
We do not ask for proof of purchase for new lantern installations generating waste.

WEEE project manage, dealing directly with contractors and installers, taking the administrative burden away from you.

Why Recolight is different

WEEE Recycle

Recolight Members recognise that WEEE compliance is about more than just ticking a box and are actively committed to protecting the environment.

We only use Approved Authorised Treatment Facilities to recycle our Members' waste. This ensures that the waste is treated responsibly, reducing its impact on the environment and maximising the amount of recycling that can be achieved.

Recolight meet targets entirely by organising the collection and recycling of waste lighting. That means we offer a free collection and recycling service – an invaluable solution for our Members, their customers, and end users.

We then use the waste we collect to meet our targets, which means we have full duty of care traceability – we know exactly where the waste we collect has come from, and how and where it gets recycled.

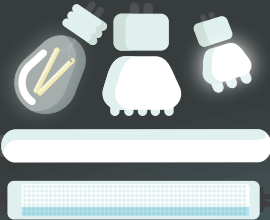

"Recolight's efficient waste street lighting collection service means ASD Lighting can satisfy our customers recycling needs with the minimum of fuss. We can confidently leave Recolight to manage our customers projects on our behalf, leaving us free to get on with running our business."

Nathan French, Director of Street Lighting

★ FREE lamp & ★ luminaire recycling

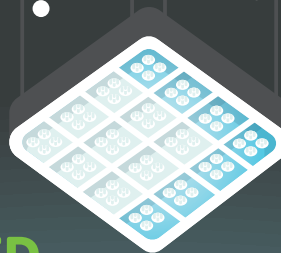

LAMPS

Recolight provides free regular collections of waste lamps, helping Members and their customers to recycle waste lamps as simply as possible.

Customers of Recolight Members collecting a minimum of 1,000 lamps every three months have access to:

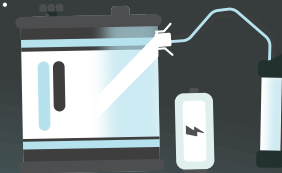

- Free storage containers.
- Free collections and recycling.
- Dedicated customer service support team - helping businesses comply with environmental regulations.

LED LUMINAIRES

Corporate social responsibility policies mean that major specifiers require their luminaire suppliers to take responsibility for this waste. Recolight is the ideal partner to meet that need.

Recolight's fastest growing service is the large scale, multi-site service for the collection of the waste lamps, luminaires, and batteries, (from emergency fittings), that arise when conventional luminaires are replaced by LED equivalents.

BATTERIES & ELECTRICAL

Recolight offer a collection and recycling service for batteries and electrical items covered by the WEEE Regulations.

Operating as a not-for-profit organisation, this service is offered at a competitive cost.
