

Recolight WORKSHOP FOR THE LIGHTING INDUSTRY

LIGHTING PRODUCT DESIGN FOR A CIRCULAR ECONOMY

7 APRIL - LONDON | 17 MAY - BIRMINGHAM | 7 JUNE - LEEDS | 14 JUNE - LONDON

Recolight announce our forthcoming series of CPD certified workshops: **Lighting Product Design for a Circular Economy.**

- There will be an opportunity for delegates to bring a fitting for review by attendees, to consider how it might be adapted for greater circularity.
- Attendance at the workshops is limited to 12 delegates, to maximise interaction and learning

Introducing your trainer

Simon Fisher, Founder & Director of F Mark

With extensive experience, Simon Fisher is a renowned and multi-award-winning lighting product designer who has successfully delivered solutions for OEMs all over the world. He is the Founder and Director of F Mark, a design consultancy specialising in the design, development and engineering of lighting products and associated systems.

Knowledge transfer and continuous development are one of the cornerstones of Simon's ethos and he has participated in numerous webinars about sustainability and the circular economy, subjects that he is very passionate about

Simon has previously delivered seminars and webinars on a wide range of topics relating to lighting, product design and engineering. He is a Fellow of the Society of Light and Lighting and sits on technical committees relating to circular economy and remanufacturing of lighting, both at the Lighting Industry Association and The British Standards Institution.

Tailored course

The course may also be booked as an in-house, single company event [please contact us for more details.](#)
